SUMMARY

Frontend Developer who enjoys turning ideas into simple and userfriendly websites. I like learning new technologies and improving my skills through building real projects and practicing regularly. I pay attention to details, enjoy solving problems, and always try to make the user experience smooth and clear. I'm looking for opportunities where I can grow as a developer and gain more real-world experience.

PROFESSIONAL EXPERIENCE

Mogo , Angular Developer

08/2025 – 05/2026

Frontend Developer at a financial and installment services company, Worked within the Tech Team on developing and maintaining internal company portals used by different departments, including Risk and Operations. Contributed to building dashboards and management systems that help teams review customer data, evaluate financial eligibility, and streamline internal workflows.

Main Project – Auto Loan System

Played a key role from the planning phase to production release in developing the company's Auto Loan platform. The system allows users to apply for car installment plans by submitting vehicle details, required financing amount, and payment information through a smooth and user-friendly process.

Responsibilities included:

- Developing responsive and scalable frontend interfaces
- Collaborating with backend and business teams to implement workflow requirements
- Improving user experience and simplifying application steps
- Building reusable components and clean frontend architecture
- Participating in testing, debugging, and production deployment
- Creating dashboards and data handling interfaces for internal teams

TECHNICAL SKILLS

HTML | CSS | Angular | Bootstrap | Java | Python | Responsive Web Design | Clean Code Principles | Debugging & Problem Solving | Cross-Browser Compatibility | CRUD Operations | Git & GitHub | REST API Integration | REST API Integration

PROJECTS

Waneesy

The platform provides real-time tracking of child activities, including completed stories, educational games, reading progress, and preferred content. Integrated an AI Coach system that offers personalized parenting guidance, behavioral support, and educational recommendations. The dashboard also includes curated parenting and health articles to help mothers improve child care and development practice

Github 

Yodneen E-commerce Website

Developed an e-commerce website for Sharia-compliant clothing with product categorization and admin dashboard features for managing products and offers.

Github 

Med-hub

A platform created to support medical students by reducing the gap in educational content between different medical schools in Egypt. The project provides both practical and theoretical materials from various universities in one place to make learning more accessible and organized. Focused heavily on user experience and ease of use, with features like subject-based chat rooms where students can communicate, ask questions, and help each other understand difficult topics. The platform also includes smooth PDF editing tools and a simple, user-friendly video player for a better learning experience.
